AbbVie's products are focused on treating conditions such as chronic autoimmune diseases in rheumatology, gastroenterology and dermatology; oncology, including blood cancers; virology, including hepatitis C virus (HCV) and human immunodeficiency virus (HIV); neurological disorders, such as Parkinson's disease and multiple sclerosis; metabolic diseases, including thyroid disease and complications associated with cystic fibrosis; as well as other serious health conditions. AbbVie also has a pipeline of promising new medicines in clinical development across such important medical specialties as immunology, oncology and neurology, with additional targeted investment in cystic fibrosis and women's health.

AbbVie Inc. reported revenue of USD 32.733 billion for the FY 2018 which saw an increase of 16% compared to FY 2017.

Company's global sales were impacted by the launch of several direct biosimilar drugs. These drugs are launched at much cheaper price anticipated by AbbVie resulting decline in sales in Europe and other international markets.

AbbVie Inc. registered highest revenue from immunology (Humira) at USD 19.936 billion. Humira continue to perform better in the U.S. market, drug sales are expected to rise approximately 7% in 2019, which is less than growth of 10% in 2018 due to lighter price contribution for the year.
