**Global  
Pesticide  
Market  
is expected to  
grow at CAGR  
3.02% till 2021**

Pesticides play a vital role in increasing the yield of a harvest. With the commodities prices facing an all-time low and the market saturated with over produced of pesticides, the year 2017 will see an almost flat growth rate, which will pick up in 2018 due to the favorable weather conditions and other factors. The global pesticide market, which was highly fragmented previously will see a merger of the big players in the industry.

The developed countries will look to utilize the products present in inventory, so the developing economies such as India, Brazil and as well as others have been identified as a potential market. Globally the market is predicted to grow at a CAGR of about 3.02% with Asia Pacific region showing the maximum growth. The factors that are driving the growth are increasing food demand and technological advances along with the presence of a highly effective operational and logistics network.

The four major types of pesticides are herbicide, insecticide, fungicide and rodenticide, which form the base of the pesticide market, with herbicide covering around 42% of the market, followed by insecticides and herbicides respectively. Rodenticide market is very small compared to the other three types as it covers only 3% of the market.

11 major companies have been covered in this report for accurately studying the market and understanding the need of the market, and to determine the growth drivers and inhibitors and trends

followed in the pesticide market.
